Nottingham City Council in response
to the Inspector's Supplementary
Questions as part of the Examination
in to the Nottinghamshire Mineral
Local Plan**

Nottingham
City Council

June 2020

Overview

Nottingham City Council responded to the Inspector's original Matters, Issues and Questions, issued on 27 February 2020, specifically to questions related to Matter 3: Minerals Provision Policies.

Since then, the Inspector has issued a further set of Supplementary Questions on 6 May 2020, which relate to each of the 5 original Matters.

The Inspector has instructed that additional responses will only be accepted from those identified as participants for the individual matters. However, Nottingham City Council has additional points that it wishes to make in relation to Matters 1, 2 and 5 as these relate to comments made to Matter 3 or the original submission.

Matter 5 – Site Allocation Development Briefs - MP2p – Mill Hill near Barton-in-Fabis

Inspector's Supplementary Questions		Nottingham City Council's response
No.	Question	
56	Should the Brief require assessment in accordance with national policy on Green Belt, including measures to mitigate any effects on the Green Belt?	Yes it should.
57	Should a requirement for assessment of effects on the Trent Valley Green Infrastructure Corridor be included?	Yes, the Trent Valley Green Infrastructure Corridor is the most important GI in South Nottinghamshire and therefore an assessment is essential.
